"We can Bag Anything"

Delivery Australia Wide

Recycle Collection Bags

Reusable polypropylene woven Recycle Collection bags are an ideal recycling solution. Made from seamless circular woven polypropylene they are strong, durable and versatile. Naturally resistant to organic solvents and rotting, they are very robust and therefore perfect for recycling promotions.

A side tie can be added so the bag can be easily filled and emptied as required. These bags are popular with councils for road side collections and are regularly used for recycling paper, bottles, cans and glass.

Recycle Collection Bags are also used for marine debris clean ups, Clean Up Australia day, coastal clean ups, builders rubble, gyprock, rags, clothing and garden waste.

Many stock sizes are available for urgent orders however bags can also be made to measure. Available for purchase unprinted per 100 or bulk purchase of 1000 bags. Printing is available with a minimum print run of 500 bags. Extra large bags are also available for those wanting to segregate bottles and cans.
